Testimonial -

From the first phone call from the customer and my arrival onsite, I knew that the Crypto virus had caused carnage beyond repair. We were talking months of data and backup infected. I done some research on paying the ransom and decided instead to make contact with FDR. I paid the initial consult and got a quote on restoration. I must say that although the price was more than I anticipated, the speed of delivery, the promise and the work ethic is second to none. They recovered 100% of the data within the time frame meaning my customer to get back to business. I would definitely recommend their services if you are hit with any of the ransomware attacks. One happy IT professional here. Kudos FDR.

I warrant that the information contained on this letter is true and correct.
