We were assisted immediately, and comforted with assurance from their side. Their professional and kind Senior Security Consultant, Ramez Yousif (and team), instantly and vigorously started working on our Servers, keeping us informed and updated as he made progress.

They managed to recover our Servers within promised timelines, provided us with a detailed Data Breach Report and made further recommendations which could possibly assist us going forward.

In many ways, we could say that had it not been for FAST Data Recovery, our company would have not been where it is now.

It is with great enthusiasm that we can strongly recommend FAST Data Recovery for their utmost expertise, proficiency and professionalism. They are absolute experts in their field. We could only wish for a similar company in South-Africa!

We are highly appreciative of what they have done for Sautech, and salute them for their services!

Warm Regards,

Riaan van Jaarsveld
